

ERNE BALL® EXPRESSION TREMOLO

I/O

INPUT connects to instrument with 1/4" mono instrument cable (Input impedance 1M Ω).

9V connects to power adapter via the standard 5.5/2.1mm DC jack (center pin negative; 100mA current consumption).

OUTPUT connects to amplifier with 1/4" mono instrument cable (Output impedance <10K Ω).

EXPRESSION CONTROL

Rock foot back and forth to adjust desired amount of tremolo and reverb affecting the signal.

HEEL DOWN - buffered original signal, no effect.

TOE DOWN - Tremolo and reverb effects at maximum, set by their respective knobs.

CONTROLS

DEPTH knob adjusts the amount of volume variation. Press the DEPTH knob to toggle the depth LED on or off. When the LED is on, the depth is dynamically adjusted by the treadle. When off, the knob sets a constant effect depth regardless of the treadle position.

RATE knob adjusts the frequency of volume variation. Press the RATE knob to toggle the rate LED on or off. When the LED is on, the rate is dynamically adjusted by the treadle. When off, the knob sets a constant effect rate regardless of the treadle position.

*When both Depth and Rate LEDs are off, both effects are adjusted dynamically by the treadle at their maximum setting, disregarding of the knob position.

WAVE knob selects the tremolo waveform.

REVERB knob adjusts the desired amount of spring reverb mixed with the effected signal.

ERNIE BALL® EXPRESSION TREMULO

LIMITED WARRANTY

Ernie Ball, Inc. will guarantee your Ernie Ball pedal for 6 months from the date of original purchase against defects in workmanship and materials. If a defect arises, the pedal will be repaired without charge if delivered FREIGHT PREPAID to the following address. It will be returned to you freight prepaid when repair is complete. It is not necessary to mail a warranty card to us; however, claim must be accompanied by PROOF OF PURCHASE in the form of a legible photocopy of your original sales slip showing where you bought it.

WE WILL NOT WARRANT YOUR ERNIE BALL PEDAL IF

1. Alterations, modifications, or add-ons have been made.
2. Unauthorized repairs have been performed or attempted.
3. Damage is caused by mistreatment or accident.

ERNIE BALL INC. / Pedal Rebuilds
53-973 Polk St. Coacheella, CA 92236

ALSO AVAILABLE:

EXPRESSION OVERDRIVE

Natural tube-like overdrive with more range than ever before. Features settings for drive, boost and tone, with a foot-sweepable overdrive control, making it effortless to go from clean to searing lead tones and everything in between.

AMBIENT DELAY

A hybrid of digital delay layered with plate reverb, for everything from slap-back to extended repeats. Features settings for delay time (50ms - 1s), delay feedback, reverb level, and a foot-sweepable effect level control to create anything from subtle textures to ambient soundscapes.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
